

Impetus4Change Insider: Sharing the Latest in Climate Science

As we head into the second year of our journey with I4C, we are excited to share with you the latest news.

In this edition:

- Learn about what our consortium has been reading
- Meet Aleks Lacima Nadolnik, a young researcher from Barcelona Supercomputing
- Check out our supermodelling video
- Upcoming events

Stay tuned for further developments and discoveries as we continue to drive positive change through the power of collaboration and innovation.

LATEST NEWS

What has I4C been reading over the past few months?

Spring is approaching, what could be better than lounging in a nice place with a good read? In this series, the I4C consortium members - Cécile Caillaud, Stephen Outten and Pablo Ortega - share their best findings with you. Discover them below and find some inspiration.

Supermodelling video

Ever wonder what happens when models are combined into super models? Discover more about the 'supermodelling' concept in our latest video! Dive into the world of climate science and discover how this innovative technique is revolutionising our understanding of environmental phenomena.

Adaptalab: Shaping Future Climate Services in Paris

The first Impetus4Change Adaptalab was held recently at the Academie du Climat in Paris. The event is the first of a series of events that will bring together participants from diverse sectors and disciplines to address real-world climate challenges through innovation and collaboration. Read more on our website!

UPCOMING EVENTS

Workshop on Climate Prediction and Services over the Atlantic-Arctic region

I4C will be present at the upcoming workshop on “Climate Prediction and Services over the Atlantic-Arctic region) to be held from 27 to 30 May in Bergen, Norway, with an option to participate online.

The workshop aims to address recent advances and challenges in climate prediction and services, focusing on the Atlantic-Arctic region. It brings together researchers and practitioners to discuss predictions of physical climate, biogeochemistry, and ecosystems.

Themes include understanding predictability mechanisms, developing prediction systems, and exploring emerging opportunities in climate services.

European Meteorological Society 2024 – Annual Meeting

From 2 September to 6 September 2024

I4C is hosting a session entirely focused on scales at this year’s European Meteorological Society Annual Meeting in Barcelona.

The session will focus on the increasing ability of models to capture environmental phenomena at higher resolutions that blur the traditional boundaries between weather, climate and air quality services.
