Impetus4Change Insider: from hackathons to conferences, this year will be 'eventful'

As we step into 2026, Impetus4Change (I4C) is pleased to announce a packed agenda. Through local exchanges, knowledge-building events, and EU-level engagements, I4C will continue to translate climate knowledge into concrete action.

Read on to find out about:

- Registration for the 3rd I4C Climate Adaptalab in Bergen
- What I4C was up to in 2025
- The I4C #MakeltReal climate knowledge quiz
- Recent scientific publications and I4C researcher insights
- Upcoming events

INSIGHTS FROM I4C RESEARCH

When the sun goes down, heat vulnerability remains: evidence from the I4C Barcelona demonstrator

A new study, led by the Barcelona Supercomputing Center and carried out by the Earth System Services group at BSC-CNS, in collaboration with the Universitat Autònoma de Barcelona, highlights how night-time heat is becoming an increasingly serious and unequal climate challenge for urban populations.

How will fire shape the future of the Iberian Peninsula?

August 2025 was marked by smoke and extreme heat, with countries like Spain and Portugal facing record-breaking wildfires. The latest climate simulations from I4C highlight the escalating fire risk in the Iberian Peninsula and its far-reaching impact. In 2025, the Iberian Peninsula has experienced unprecedented wildfires: a persistent, underlying signature of climate change.

3rd I4C Climate Adaptalab

16-18 June 2026 (Bergen, Norway)

Building on previous editions in Paris and Barcelona, the I4C Climate Adaptalab in Bergen will be a **milestone for the project**.

The Adaptalab's **hackathon-style format** supports collaborative learning, co-creation, and the development of actionable climate services tailored to local needs.

Working groups will focus on developing **policy briefs** around the following themes:

1. Governance for Effective Adaptation
2. Co-production & Inclusive Climate Communication
3. Removing Barriers to Urban Climate Service Innovation
4. Climate Data in Urban Planning
5. From Local Adaptation to EU Research and Policy

Register now to take part and help I4C contribute to shaping effective responses to climate adaptation challenges!

EGU 2026

3–8 May 2026 | Vienna, Austria

The EGU 2026 General Assembly will bring together the global geoscience community for a major hybrid event covering Earth, planetary, and space sciences. Taking place in Vienna and online, EGU26 offers an open and inclusive forum for researchers at all career stages to present their recent findings, exchange knowledge, and foster interdisciplinary cooperation.

I4C researchers will actively engage in discussions and knowledge-sharing throughout the Assembly, contributing their expertise and exploring opportunities for collaboration.

More information will be available soon on the I4C website!

EURESFO 2026

17–19 June 2026 | Guimarães, Portugal

The 13th European Urban Resilience Forum (EURESFO) will bring together city leaders, practitioners, researchers and policymakers to explore integrated approaches to climate resilience that move beyond adaptation.

The focus of the 2026 edition will be on exploring integrated approaches to climate resilience that move beyond adaptation, inspired by Guimarães's long-standing commitment to embedding sustainability into its cultural fabric.

I4C 'Make it Real' Roadshow

In June 2025, we launched the official I4C 'Make It Real' Roadshow, a multi-city event series designed to bring climate knowledge, information, and data to life for local practitioners and policymakers throughout Europe.

The Roadshow will continue throughout the rest of the project, taking project results straight to the people who are shaping the cities of tomorrow. It's all about bringing climate information, maps, and analysis tools directly to city planners, policymakers, and communities, making it easier for them to plan, act, and build cities that are ready for the future.

Stay tuned for updates on I4C website!
